EXPERIENCE

IT Development Co-Op

May 2025 – Present

Valvoline Global Operations

Lexington, KY

- Develop enterprise applications using Java, Spring Boot, Hibernate, and Angular.
- Collaborate with engineers, analysts, and business stakeholders to implement technical solutions.
- Contribute to AI-focused initiatives involving workflow automation and intelligent business applications.

Teaching Assistant & Academic Tutor

Aug 2024 – Present

University of Kentucky

Lexington, KY

- Teach CS 115 lab sections, hold office hours, grade assignments, and support students learning Python.
- Tutor undergraduate mathematics students through Mathskeller in individual and group settings.
- Mentor first-year engineering students in project development, problem solving, and collaborative design.

PROJECTS

AI Research Assistant. Conducted undergraduate research under Dr. Brent Harrison focused on AI and intelligent tutoring systems for mathematical problem solving.

Pyraminx Solver Using A* Search. Designed and implemented a C++ solver using A* search and a custom heuristic to efficiently solve Pyraminx puzzle states.

Personal Portfolio Website. Developed a responsive website using HTML, CSS, and JavaScript to showcase technical projects, experience, and skills.

LEADERSHIP

• YoungLife Leader

Aug 2025 – Present

Mentor middle school students through weekly club meetings, small groups, Bible studies, and one-on-one relationship building focused on Christian discipleship and spiritual growth.

• CatHacks Sponsorship Team

Aug 2023 – May 2024

Helped build relationships with industry partners and secure sponsorship support for the University of Kentucky's annual hackathon.
